***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 25 and 27 - 35, drawn to a method for inhibiting or controlling inorganic scale formations in a subterranean formation or in a wellbore, classified in class 166, subclass 310.
  - II. Claims 26, and 36 - 44, drawn to a completion fluid for use in an oil or gas well, classified in class 507, subclass 219.
2. The inventions are distinct, each from the other because:
3. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used as a drilling fluid or as a gravel packing fluid.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
